20. Fair value measurements

A. and B.

The Company had no material assets or liabilities measured and reported at fair value at March 31, 2017.

C. Certain of the Company's financial instruments are measured at fair value in the financial statements. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by U.S. generally accepted accounting principles. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

25. Change in incurred claims and claims adjustment expense

Reserves as of December 31, 2016 were \$8,580,766. As of March 31, 2017, \$5,230,124 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$7,997,084 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on comprehensive and Medicare lines of insurance. Therefore, there has been a \$583,682 favorable prior year development from December 31, 2016 to March 31, 2017. The resulting development does not consider health care receivables. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Included in this increase, the Company experienced \$290,399 of favorable prior year claim development on retrospectively rated policies. However, the business to which it relates is subject to premium adjustments.
